| REACT KONVA | UI/UX DESIGN |

INTERESTS

- Programming (of course!)
- Building PCs
- Go-karting
- Video games

PROFILE

I am an ambitious, creative and self-motivated individual, who is enthusiastic about full-stack website development. I was the sole developer in a start-up company where I built a web application from scratch into a production-ready product. Also, I am actively undertaking multiple online courses to better my knowledge and skills within this industry. I am currently seeking a suitable role that is in-line with my current goals and interests within a progressive, ambitious, and reputable company.

WORK EXPERIENCE

Full-Stack Web Developer

Davies Group (DTS), Oxford | April 2022 – Present

- I am involved in/and continually adapt to a multitude of different products across the company with slightly different technology stacks.
- I am required to follow software development methodologies (such as agile) in my day-to-day work.
- I use my own initiative to problem-solve on a day-to-day basis to transform a client's specification into clean and intuitive coding solutions.
- I communicate effectively with a vast amount of roles in the company, such as (lead) developers, BAs, designers, project managers etc.
- I pay very close attention to detail to solve problems and prevent/fix bugs.
- I am hard-working and keep a positive work ethic even in the most challenging and time-critical scenarios.
- I am exposed to lots of different libraries and frameworks in the JS ecosystem, so have a lot of vast knowledge in this area.
- I am continually keeping up to date with the latest advancements in the industry, and recommending and applying that knowledge where I can.

Full-Stack Web Developer

Desk Booker, High Wycombe | Sept 2021 – April 2022

- I took a start-up specification from an empty project to a production-ready application.
- I was able to self-teach all of the vital skills needed to create a web application from no previous experience.
- I used my own initiative to select an appropriate development stack and to make complex decisions.
- I continually adapted to newly introduced industry resources.
- I worked as part of a team on regular occasions to present my work, evaluate the specification, and suggest improvements.
- I paid close attention to detail to solve problems and fix bugs on a daily basis.
- I was hard-working and kept a positive work ethic even in the most challenging and time-critical scenarios.

Maintenance Technician Apprentice

BMW Group, MINI Plant, Oxford | Sept 2017 – Sept 2021

- I adapted to the vast number of differences between areas within the factory.
- I developed and tested my own programmes with Siemens PLCs and ABB Robotics.
- I shadowed qualified maintenance technicians and took advantage of any training opportunities.
- I paid close attention to detail to solve problems on a daily basis using industry-approved fault-finding techniques.
- I communicated effectively with different staff on all levels.
- I trained new apprentices to help them develop their skills and knowledge.
- I took ownership of any work I completed by signing off job documentation.
- I always aimed to keep a positive work ethic even in the most challenging of scenarios.
